### 5.2 Special hazards arising from the substance or mixture

Hazard from the : Extremely flammable aerosol. In a fire or if heated, a

substance or mixture pressure increase will occur and the container may burst,

with the risk of a subsequent explosion. Gas may

accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion. Bursting aerosol containers may be propelled

from a fire at high speed.

Special Exposure Hazards: Beware of exploding cans.

# **5.3** Advice for fire fighters:

Flammable product. Container is liable to explode if subjected to extreme temperatures >50°C. Protective Equipment for Fire-fighters: Self-contained breathing apparatus and protective clothing. Follow standard procedure for chemical fires.

Prevent fire-fighting water entering water courses or ground water.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

### 6.1 Personal precautions, protective equipment and emergency procedures

**6.1.1. For non-emergency personnel** Evacuate surrounding areas.

:

Remove all ignition sources. Ensure adequate ventilation. Wear appropriate personal protective equipment. See

personal protective equipment in section 8.

**6.1.2. For emergency responders** :See the information "for non-emergency personnel

See personal protective equipment in section 8.

Large spills/enclosed spaces: a self-contained breathing apparatus is recommended. Monitor area with combustible

gas meter if necessary.

**6.2** Environmental

**Precautions** 

Avoid dispersal of split material and runoff and contact with

soil, waterways, drains, and sewers. Inform the relevant Authorities if the product has caused environmental

pollution (sewers, waterways, soil and air)

Dilute with water and mop up if water-soluble.

Large spill: Stop leak without risk. Move containers from spill area.

Approach the release from upwind. Prevent entry to sewers, water courses, basements or confined areas. Absorb spillage with non-combustible, absorbent material e.g sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the split product.

Do not pierce or burn, even after use. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparkling tools. Empty containers retain product residue and can be hazardous.

7.2 Conditions for safe

Storage, including any incompatibilities

Pressurised container: protect from sunlight and do not

exposure to temperature exceeding 50°C

Store away from

direct sunlight in a dry ,cool, and well-ventilated area, away from incompatible materials (see section 10), food and drink. Store and use away from heat, sparks, open flame or any other ignition source. Use appropriate containment to avoid environmental contamination
